

Amendments to the Specification:

Please replace the paragraph on page 26 of the specification entitled ABSTRACT OF DISCLOSURE with the following amended paragraph:

ABSTRACT OF DISCLOSURE:

A method and apparatus to modify power levels for devices in a system in response to changes in power conditions is described. A power level of a power supply providing power to a plurality of devices is monitored. A change in the power level of the power supply is detected, a modification signal is created to modify the operating power level of at least one of the plurality of devices and the modification signal is sent to the device.
